

## Chatroom Suggestions

It is best to perform from a bed or couch, position the webcam as close as possible. We recommend that you use quality bed linen such as satin or velour sheets, with a decorative background such as drapes and anything else that may make the chat room look sexy and professional.

It is important that you select light colours for your background as they reflect light well and also use additional lighting such as professional lamps, poor light conditions produce bad video streaming quality and reflects on your ability to convert viewers into paying customers.

Keep your working environment professional, an untidy background with glasses, food or clothes or anything else that will distract the viewers attention from you.

We cannot re-iterate the importance of how you present yourself reflects on your overall success.
